n	i
10	10
10	5
10	6
10	3
10	4
10	2

2. Output of program:
    10
    5
    6
    3
    4
    2

3. This program terminates when n = 1 because in order for the loop to run the value of n must be greater than 1.
